

OEKO-TEX®

LEATHER STANDARD

What is OEKO-TEX® LEATHER STANDARD?

The OEKO-TEX® LEATHER STANDARD is an internationally standardised independent testing and certification system for leather and leather goods at all production levels, including accessory materials used.

**LEATHER
STANDARD**
00.000.0000
Hohenstein HTTI

The test for harmful substances includes:

- Substances which are prohibited and regulated by law
- Chemicals that are known to be harmful to health, but which are not regulated by law
- Substances that are believed to be harmful to health

What do you get?

- A detailed report and a certificate valid for one year as proof of the successful testing of your leather products for harmful substances.
- A label with which you can communicate the safety of your product to your consumers and business partners and thus set yourself apart from the competition.
- The opportunity to save costs through the OEKO-TEX® modular system. This is because certificates for starting materials can be recognized at subsequent production stages, so that renewed laboratory testing is only necessary to a limited extent.
- The opportunity to present your certified product range and your company in detail are free of charge in the OEKO-TEX® Buying Guide: <https://www.oeko-tex.com/en/buying-guide>

How is the LEATHER STANDARD integrated in the OEKO-TEX® system?

The OEKO-TEX® LEATHER STANDARD is structured in the same way as the OEKO-TEX® STANDARD 100 . It is used for both B2B communication within the value creation chain and for B2C communication. For products with leather and textile parts, the LEATHER STANDARD and STANDARD 100 are used in combination.

Together with the STeP by OEKO-TEX® certification for environmentally friendly and socially responsible production companies, the LEATHER STANDARD forms the basis for awarding the OEKO-TEX® MADE IN GREEN label.
